MINI2

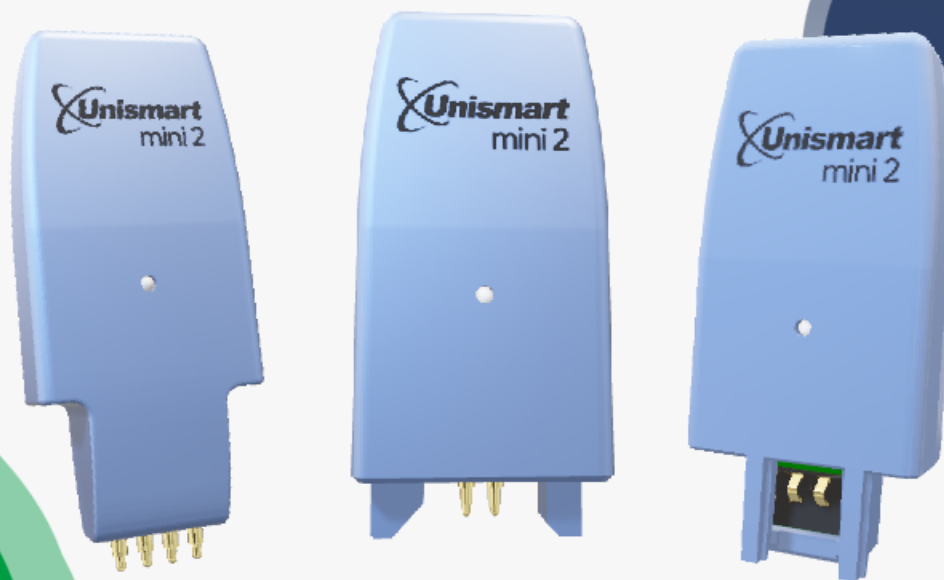

End-user Orientated

Geehy

Mini 2 Introduction

Position

Unismart Mini 2 is a lightweight and intelligent upgrade device that is designed for end-users, **providing them with a new and intelligent experience.**

Mini 2 Introduction

Firmware upgrade causes the product to not be recognized...

Application Scenario

When OEM firmware upgrades cause the chip to be unrecognized, the end-user will connect their phones to the device, using the app to upgrade the consumable within **2 seconds, allowing the product to be used immediately**, resulting in a satisfying experience.

1 SMALL

Ultra-small and light, easy to hold in one hand

The Mini 2 device adopts a breakthrough ultra-small and ultra-light design, making it easy to carry and store.

2 EASY

Convenient alignment and intelligent identification

The Mini 2 device uses a simple and intuitive APP user interface, one-touch intelligent recognition function, highly secure hardware design, fast alignment, simple and efficient.

3 FAST

Ultimate performance, extreme speed

The performance of the Mini 2 device exceeds that of similar products. With its self-developed CPU design, it performs with high-speed, allowing customers to enjoy an extremely fast experience.

4 SAVE

Save time, money, and worry

Mini 2 devices bring customers an extremely economical experience. Savings! Savings! Savings!

Small

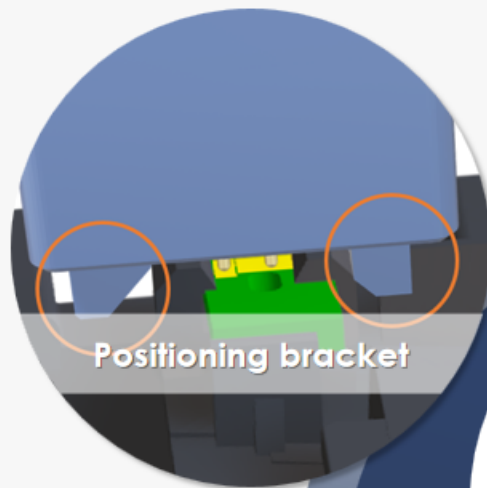

Ultra-small and
ultra-light, can be
held in one hand

Size: **47(L) *22(W) *11(H)mm**, Weight: approx. **8g**,
Just like a USB flash drive. The ultra-small and ultra-light
design ensures maximum durability and flexibility. It
can be shipped together with consumables for easy
upgrade.

Easy

Simple and intelligent identification of alignment

- ✓ Simple and intuitive **APP interface**, easy-to-understand **Operation animation**.
- ✓ **One-touch intelligent recognition**, no need for manual selection, easy to upgrade.
- ✓ **Optimized UX** design, convenient positioning and strong versatility.

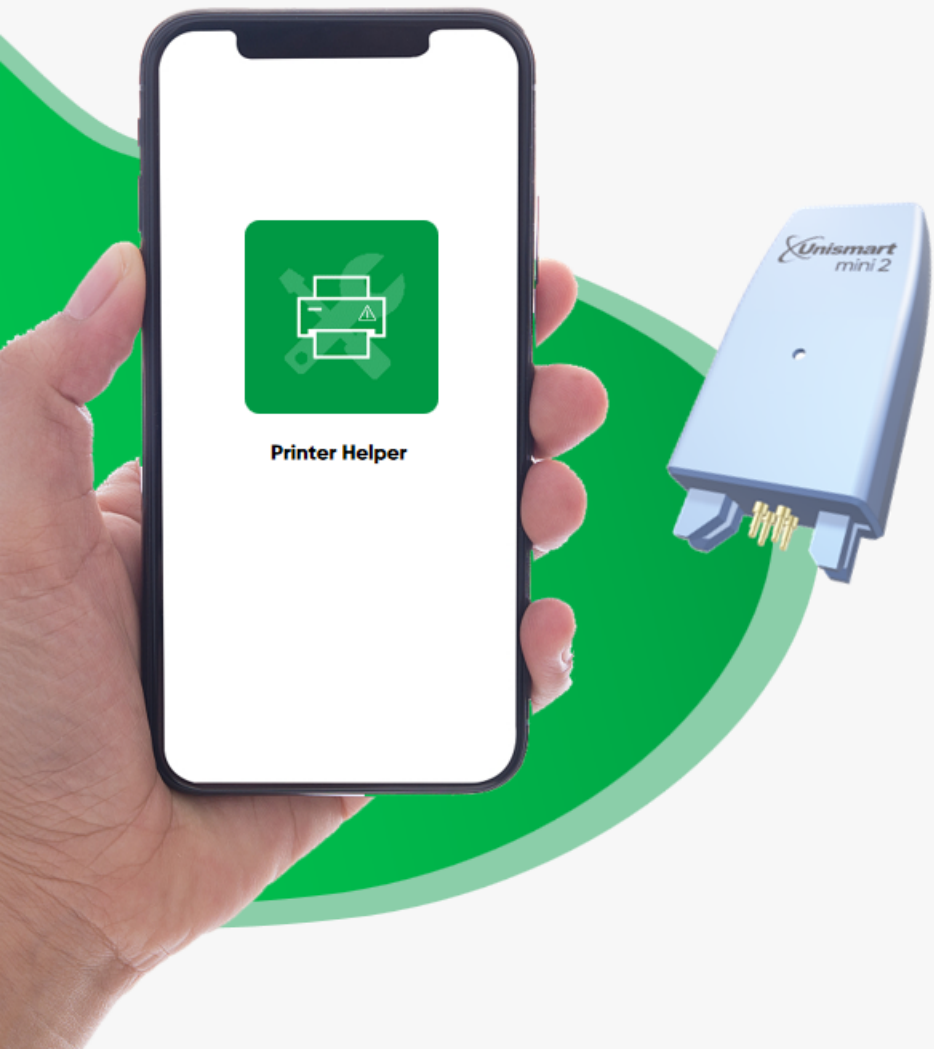

Fail-proof plug-in design

A circular inset showing a blue component being inserted into a black socket. A yellow lightning bolt symbol indicates a fail-proof or secure connection.

Contact Alignment

A circular inset showing a top-down view of a blue component with four yellow contacts aligned with a black socket.

Fast

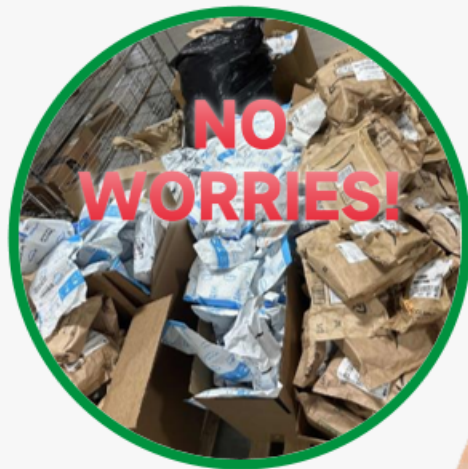

Ultimate Performance Experience

Experience high-speed performance with our self-developed CPU design and intelligent recognition scheme, allowing for upgrades in as fast as **2 seconds** for an exceptional experience.

Save money, time, effort and worry

Save

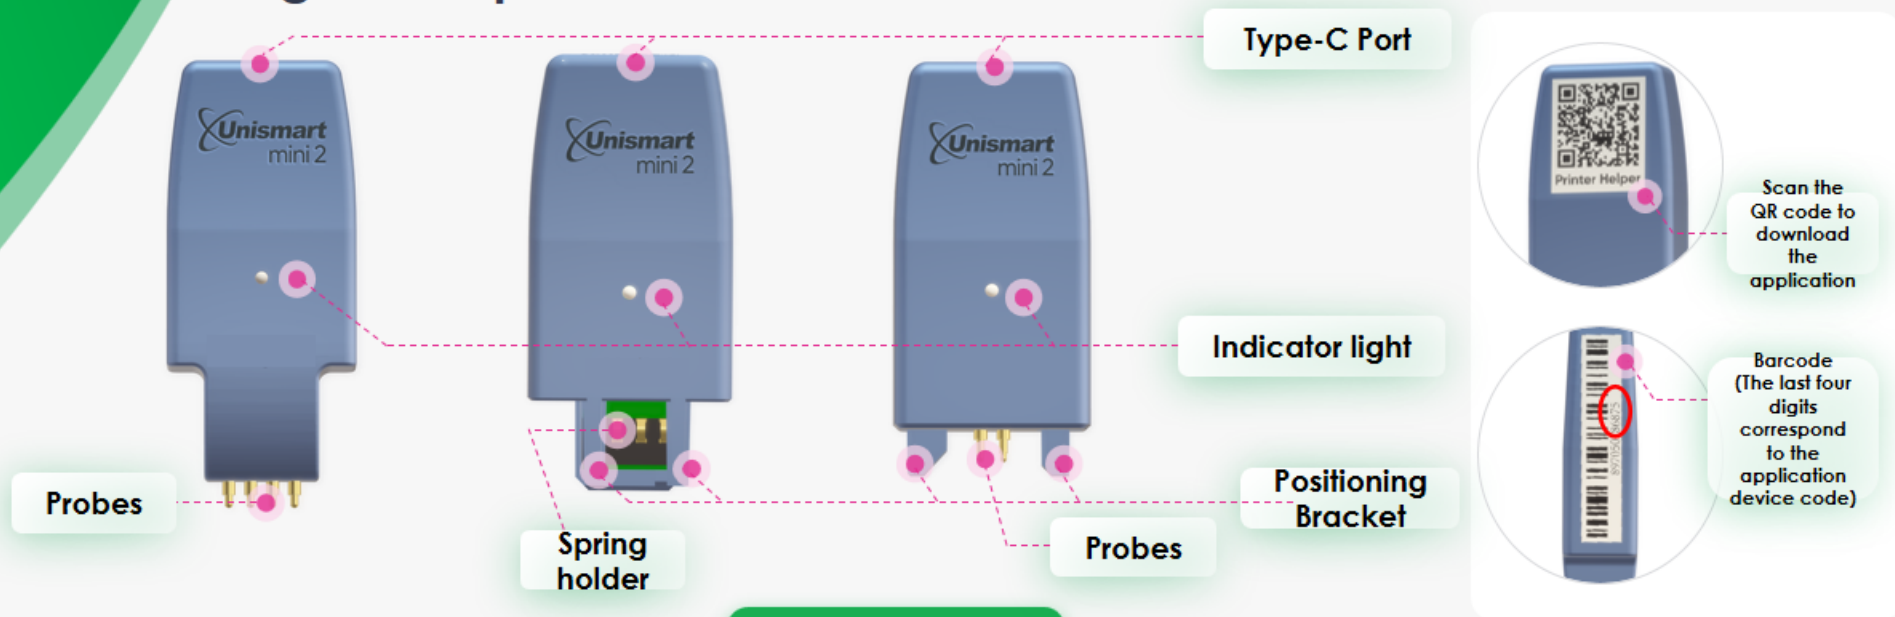

- ✔ Reduce the combined cost of returns and exchanges, rework, logistics, and transportation;
- ✔ Reduce customer complaints by about **10~20%** and maintenance cost of e-commerce platforms;
- ✔ The APP **supports several different languages**, such as Chinese, English, French, Spanish, Portuguese, Arabic, Russian, Japanese, and Korean to meet demands.
- ✔ Serviceism customer service system provides **24-hour customer service**, reducing your worries;
- ✔ Save money, time, trouble, effort, and worry by bringing you an extremely efficient experience.

Product design and specifications

Unismart mini 2

Specifications

CPU | Custom MCU, frequency 160MHZ
Data Transmission | USB2.0 Protocol, BT5.2 Protocol
Power Interface | Type-C Port
Power Input | DC 5V/100—1000mA

Working Temperature | -20°C—55°C
Dimensions | 47(L) *22(W) *11(H)mm; Weight: 8(g)
Data Cable | USB cable A-C interface, cable length: 50cm

Mini2 Phone/Tablet Compatibility

Android phone/tablet
Compatible version | Version
6.0 and above
(phones released after 2015)

Apple mobile phone/tablet
Compatible version | IOS12 and above
(mobile phones after 2020)

Only three steps are needed to complete the
firmware upgrade!

Printer Helper

✓ Installed

STEP 1
Install APP

STEP 2
Connect to
Bluetooth

STEP 3
Upgrade Chip
